

Dear Family Caregiver,

Over the past several months, Family Caregiver Alliance was able to provide caregiver support services to you with funding from our contract with the local Area Agency on Aging. We hope these services have provided support for you as a caregiver and helped you access needed resources.

FCA services are funded through a combination of contracts with the counties and state of California, private foundations and donors, and individual contributions. If you are able to contribute \$5, \$15, \$25, \$50, or more, FCA will make sure your voluntary, confidential contribution is used **exclusively for direct services to local families**.

For your convenience, you may also contribute online through our website www.caregiver.org or directly at: <https://caregiver.networkforgood.com/>.

Contributions are voluntary and no eligible person will be denied any services for not being able to contribute.

FCA has provided services to family caregivers for over 40 years and the support from you and our funders helps us meet the growing needs of caregivers and extend our reach.

With appreciation,

Christina Irving, LCSW
Client Services Director
